SUMMARY

Development of large scale software has fostered my interest in intelligent systems with smart and threat preventive features. Specifically interested in Artificial Intelligence, machine learning (ML), Forensics-security, as well as their applications and explainability, are my areas of interest to explore and reduce knowledge gaps in these related fields. Recent work on Deep Q-Network in Machine learning equipped my career trajectory from industry application to research innovation. Seven years professional experience taught me strong analytical capabilities, managing tasks effectively with team co-operation. Self-motivated and adaptable to dynamic project requirements.

EDUCATIONS

- **Dhaka International University, Dhaka, Bangladesh** July_2025 - Ongoing
Master of Science in Computer Science Engineering, CGPA: 3.78/4.0
- **Khulna University of Engineering & Technology, Bangladesh** February_2012 – April_2016
Bachelor of Science in Computer Science Engineering

PROFESSIONAL EXPERIENCES

- Senior Officer-IT- JANATA BANK PLC. (March 2021- present)
 - *Bangladesh Electronic Funds Transfer Network, Real-Time Gross Settlement*
Developed in Spring boot and web including Oracle 19c database.API communicates with the Core Banking Software and Bangladesh Bank with financial transactions in different sessions.All branches of Janata Bank are using this software successfully. Spring security is used for internal authentication and firewall, antivirus provides external security.
- Software Engineer – AtomAP Limited (16 September 2019 – April 2020)
 - *Java: Japan Banking System Solution for Payment (Web & API)*
Developed secure payment APIs and banking wallet systems for real-time financial services. Worked on IoT-based automation systems including smart sensors and monitoring applications. Collaborated in backend development using Java Spring technologies and distributed architectures.
 - *IoT projects (Car Automation System, Gas Alarm, Weight Alarm)*
- Software Engineer – Pine Solutions Limited (10 March 2019 - 15 September 2019)
 - *PYTHON & LARAVEL: WeeReach*
API created for huge volume text SMS and voice SMS for bank customers notifications in easy and fastest way
- Software Engineer – BJIT Limited (01 October 2016 - 10 January 2019)
 - *JAVA: Event Management Platform (Rakuten - E-commerce of Japan)*
API created for business campaigns, events and ads including web for create, update, approval in all sections with email notifications. whole life cycle managed by JBPM customized based on projects, front end used by AngularJS with Spring web. Databases used were MySQL and Redis.
 - *Groovy: API Development Team (Rakuten - E-commerce of Japan)*
REST API created for communicating with multiple backend APIs with response. New API created or existing modified according to the requirement. Authentication processed by a layer named Rakuten App Engine. It worked like a multiple middleware application.
 - *Python: ANC Silencer (Noise Cancellation with Digital Signal Processing)*
 - *Android: Reata (Personal Assistant for voice and text communication)*

TECHNICAL SKILLS

- Programming Languages: Java, Python, C++
- Framework: Spring Boot, Spring Data JPA, Spring Security, Hibernate
- Others: Apache Tomcat, Postman, Android, NumPy, Scikit-learn, Keras, Matplotlib, TensorFlow, PyTorch
- Testing Framework: Spock, Junit
- Database: Oracle 19c, MySQL
- Platform Used: Linux (Ubuntu), Windows
- Used To: Eclipse, IntelliJ Idea, PyCharm, Code blocks,
- Collaboration tools: Git, JIRA, Confluence, Trello
- Networking: CCNA training-KUET, CCNA(R&S)

PUBLICATION

"[Reinforcement Learning for Optimizing Bowling Strategies in One Day Internationals](#)" - Hasibul Hasan Rupok, Md. Safiqul Islam Saikat, Md Shafikul Islam "International Conference on Computer and information Technology (ICCIT)", Cox's Bazar, Bangladesh, 2025, doi: [10.1109/ICCIT68739.2025.11490554](#)

THESIS

Online Purchase and Sales Management System | Python, MySQL and Django Web Framework, Pillow, Bootstrap, jQuery, and CanvasJS. VPS(USA), Nginx, WSGI, Mozilla Let's Encrypt | E-commerce site with Admin panel which could give ads about their products. Inventory managed by central office through online. Users could order products and pay through payment gateway or cash-on delivery. SMS system integrated and rating with CanvasJS. VPS from Ramnode.com was bought from the USA. Nginx was used as a web server and WSGI, Mozilla Let's Encrypt for security.

Git: <https://gitlab.com/users/saikat25/projects>

ACADEMIC PROJECTS

- Event Management System | Java, MySQL, Mysql-connector-java-5.1.34, Apache/2.4.10, PHP/5.5.15 | A Desktop application to create, customize, edit or delete event information according to the requirements. Default packages remained as examples.
- File Downloader | PHP, MySQL, HTML, CSS, Apache | Create an account, and download free software provided by the site.
- Term result Calculator | Java, MySQL- connector-java-5.1.2, JDBC, LSC, itextpdf- 5.4.3 | Desktop based software for generating automated result. Data entry facilities were categorized based on courses taken, semesters and other related data. Create each result sheet in pdf format which was easy to print for faculty persons.
- Hospital Management | Oracle 10g | Doctors, patients who maintain a schedule according to their appointments. After consultation, the schedule status would be changed in the database.

CERTIFICATION

- Advance Training on Oracle Database Management – IBCS-PRIMAX SOFTWARE(BD) Ltd.
- Cisco Certified Network Associate Routing and Switching (Cisco ID- **CSCO12932705**)
- Programming for Everybody - University of Michigan – **COURSERA**
- Python Data Structures - University of Michigan – **COURSERA**
- Using Python to Access Web Data - University of Michigan – **COURSERA**
